- Zariski Topology
- Quivers and Representations
- Orbits and orbit closures of Representations

(ロ)、(型)、(E)、(E)、 E) の(の)

 We shall illustrate the interaction of linear algebra with topology and geometry.

◆□▶ ◆□▶ ◆臣▶ ◆臣▶ 臣 のへぐ

- We shall illustrate the interaction of linear algebra with topology and geometry.
- 2 More precisely, we shall describe the orbit closures in the Zariski space of  $m \times n$  matrices.

◆□▶ ◆□▶ ◆三▶ ◆三▶ 三三 のへぐ

• Throughout, let k be an infinite field.

◆□▶ ◆□▶ ◆臣▶ ◆臣▶ 臣 のへぐ

## Proposition

- The closed sets in  $\mathbb{A}^1$  are finite sets and  $\mathbb{A}^1$ .
- If Y is an infinite subset of  $\mathbb{A}^1$ , then  $\overline{Y} = \mathbb{A}^1$ .

- $\mathbb{A}^1 = k$ , where k is an infinite field.
- **2** The coordinate ring is k[x].

## Proposition

• The closed sets in  $\mathbb{A}^1$  are finite sets and  $\mathbb{A}^1$ .

• If Y is an infinite subset of  $\mathbb{A}^1$ , then  $\overline{Y} = \mathbb{A}^1$ .

*Proof.* Let  $C = \mathcal{Z}(F)$  for some  $F \subseteq K[x]$ .

- $\mathbb{A}^1 = k$ , where k is an infinite field.
- **2** The coordinate ring is k[x].

### Proposition

• The closed sets in  $\mathbb{A}^1$  are finite sets and  $\mathbb{A}^1$ .

**a** If Y is an infinite subset of 
$$\mathbb{A}^1$$
, then  $\overline{Y} = \mathbb{A}^1$ .

*Proof.* Let  $C = \mathcal{Z}(F)$  for some  $F \subseteq K[x]$ .

Since k[x] is a principal ideal domain,  $\mathcal{Z}(F) = \mathcal{Z}(f)$  for some  $f \in k[x]$ .

- $\mathbb{A}^1 = k$ , where k is an infinite field.
- **2** The coordinate ring is k[x].

### Proposition

- The closed sets in  $\mathbb{A}^1$  are finite sets and  $\mathbb{A}^1$ .
- If Y is an infinite subset of  $\mathbb{A}^1$ , then  $\overline{Y} = \mathbb{A}^1$ .

*Proof.* Let  $C = \mathcal{Z}(F)$  for some  $F \subseteq K[x]$ .

Since k[x] is a principal ideal domain,  $\mathcal{Z}(F) = \mathcal{Z}(f)$  for some  $f \in k[x]$ .

If  $f \neq 0$ , since k is a field,  $C = \mathcal{Z}(f)$  is finite.

- $\mathbb{A}^1 = k$ , where k is an infinite field.
- **2** The coordinate ring is k[x].

## Proposition

• The closed sets in  $\mathbb{A}^1$  are finite sets and  $\mathbb{A}^1$ .

**a** If Y is an infinite subset of 
$$\mathbb{A}^1$$
, then  $\overline{Y} = \mathbb{A}^1$ .

*Proof.* Let 
$$C = \mathcal{Z}(F)$$
 for some  $F \subseteq K[x]$ .

Since k[x] is a principal ideal domain,  $\mathcal{Z}(F) = \mathcal{Z}(f)$  for some  $f \in k[x]$ .

If 
$$f \neq 0$$
, since k is a field,  $C = \mathcal{Z}(f)$  is finite.

If 
$$f = 0$$
, then  $C = \mathcal{Z}(0) = \mathbb{A}^1$ .

$$M_{m \times n}(k) := \{ (a_{ij})_{m \times n} \mid a_{ij} \in k \}.$$

 $\overline{\mathscr{O}(A)} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}.$ 

- Proof.  $\mathscr{E} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}$  is closed.
- Since  $\mathscr{O}(A) = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) = 1\}$ , we have  $\mathscr{E} = \mathscr{O}(A) \cup \{0_{m \times n}\} \Rightarrow \overline{\mathscr{O}(A)} \subseteq \mathscr{E}$ .
- ∃ continuous map f : A<sup>1</sup> → M<sub>m×n</sub>(k) : a → aE<sub>11</sub>, where (1, 1)-entry of E<sub>11</sub> is 1, and all other entries are 0.

#### Lemma

If 
$$A \in M_{m \times n}(k)$$
 with  $\operatorname{rank}(A) = 1$ , then  
 $\overline{\mathscr{O}(A)} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}.$ 

- Proof.  $\mathscr{E} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}$  is closed.
- ② Since  $\mathscr{O}(A) = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) = 1\}$ , we have  $\mathscr{E} = \mathscr{O}(A) \cup \{0_{m \times n}\} \Rightarrow \overline{\mathscr{O}(A)} \subseteq \mathscr{E}$ .
- ∃ continuous map f : A<sup>1</sup> → M<sub>m×n</sub>(k) : a → aE<sub>11</sub>, where (1, 1)-entry of E<sub>11</sub> is 1, and all other entries are 0.

#### Lemma

If 
$$A \in M_{m \times n}(k)$$
 with  $\operatorname{rank}(A) = 1$ , then  
 $\overline{\mathscr{O}(A)} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}.$ 

- Proof.  $\mathscr{E} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}$  is closed.
- ② Since  $\mathscr{O}(A) = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) = 1\}$ , we have  $\mathscr{E} = \mathscr{O}(A) \cup \{0_{m \times n}\} \Rightarrow \overline{\mathscr{O}(A)} \subseteq \mathscr{E}$ .
- ∃ continuous map f : A<sup>1</sup> → M<sub>m×n</sub>(k) : a → aE<sub>11</sub>, where (1, 1)-entry of E<sub>11</sub> is 1, and all other entries are 0.

Since  $\mathbb{A}^1 \setminus \{0\}$  is infinite and  $f^{-1}(\overline{\mathcal{O}(A)})$  is closed,

#### Lemma

If 
$$A \in M_{m \times n}(k)$$
 with  $\operatorname{rank}(A) = 1$ , then  
 $\overline{\mathscr{O}(A)} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}.$ 

- Proof.  $\mathscr{E} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}$  is closed.
- ② Since  $\mathscr{O}(A) = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) = 1\}$ , we have  $\mathscr{E} = \mathscr{O}(A) \cup \{0_{m \times n}\} \Rightarrow \overline{\mathscr{O}(A)} \subseteq \mathscr{E}$ .
- ∃ continuous map f : A<sup>1</sup> → M<sub>m×n</sub>(k) : a → aE<sub>11</sub>, where (1, 1)-entry of E<sub>11</sub> is 1, and all other entries are 0.
- Since  $\mathbb{A}^1 \setminus \{0\}$  is infinite and  $f^{-1}(\overline{\mathcal{O}(A)})$  is closed,

$$\mathbb{A}^1 = \overline{\mathbb{A}^1 \setminus \{0\}} \subseteq f^{-1}(\overline{\mathscr{O}(A)}).$$

#### Lemma

If 
$$A \in M_{m \times n}(k)$$
 with  $\operatorname{rank}(A) = 1$ , then  
 $\overline{\mathscr{O}(A)} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}.$ 

- Proof.  $\mathscr{E} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq 1\}$  is closed.
- ② Since  $\mathscr{O}(A) = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) = 1\}$ , we have  $\mathscr{E} = \mathscr{O}(A) \cup \{0_{m \times n}\} \Rightarrow \overline{\mathscr{O}(A)} \subseteq \mathscr{E}$ .
- ∃ continuous map f : A<sup>1</sup> → M<sub>m×n</sub>(k) : a → aE<sub>11</sub>, where (1, 1)-entry of E<sub>11</sub> is 1, and all other entries are 0.
- Since  $\mathbb{A}^1 \setminus \{0\}$  is infinite and  $f^{-1}(\overline{\mathcal{O}(A)})$  is closed,

$$\mathbb{A}^1 = \overline{\mathbb{A}^1 \setminus \{0\}} \subseteq f^{-1}(\overline{\mathscr{O}(A)}).$$

• Thus,  $f(0) = 0_{m \times n} \in \overline{\mathcal{O}(A)} \Rightarrow \mathscr{E} \subseteq \overline{\mathcal{O}(A)} \Rightarrow \overline{\mathcal{O}(A)} = \mathscr{E}$ .

### Theorem

• Given any 
$$A \in M_{m \times n}(k)$$
, we obtain

$$\overline{\mathscr{O}(A)} = \{B \in M_{m \times n}(k) \mid \operatorname{rank}(B) \leq \operatorname{rank}(A)\}.$$
